Index Description. The S-Network Space Index (TICKER: SPACE) is a modified capitalization weighted, float- and space revenue percentage-adjusted equity index designed to serve as an equity benchmark for globally traded stocks that are materially engaged in space-related businesses.

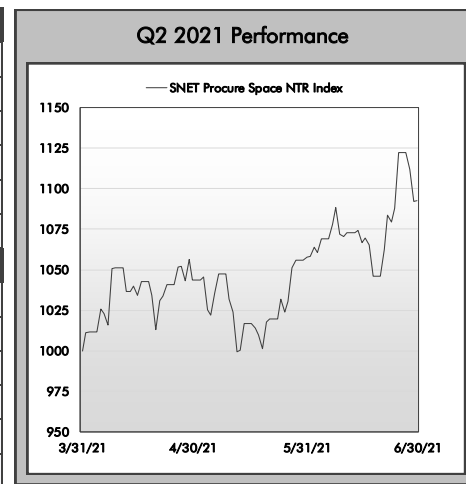

Inclusion Criteria. SPACE selects companies that meet one or more of several criteria for space-related business activities (such as manufacturing space vehicle components and operating satellites), while also deriving revenues from space that amount to at least 20% of the total and/or more than 500 million USD annually. Constituents of SPACE must have three-month ADTV of at least 1 million USD.

Weighting Methodology. SPACE sorts constituents into two tranches: "Non-diversified" for companies that derive the majority of their revenues from space, and "Diversified" for the rest. Constituents are weighted within each tranche by market capitalization adjusted for both the stock's float and the company's space revenue percentage. SPACE sets the total tranche weights at 80% for the Non-diversified tranche and 20% for the Diversified tranche. Within each tranche, constituent weights are capped: 6% within the Non-diversified tranche, and 12% within the Diversified tranche.

Review Schedule. SPACE is rebalanced quarterly and reconstituted semi-annually in June and December.

Index Data. SPACE is calculated daily by S-Network Global Indexes. Daily live values from May 7, 2018 are available through S-Network, and backtested values are available from December 31, 2014. End-of-day index values are distributed daily via the NYSE Global Index Feed.
